Iberian Peninsula (Spain and Portugal)

HRI Food Service Sector

Annual

2007

Approved by:

Stephen Hammond

U.S. Embassy

Prepared by:

Arantxa Medina

Report Highlights:

The growing Iberian Peninsula (IP) Hotel, Restaurant and Institutional (HRI) sector provides excellent opportunities for U.S. food-ingredient and food-product exporters. Market access, however, can be complicated, requiring potential U.S. exporters to meet specific criteria and to take certain, identifiable steps before exporting.

Includes PSD Changes: No

FAS/Iberia (2) 2006 Estimates and (3) 2007 Forecasts using historical data and FAS/Iberia input, unless otherwise identified.

The Iberian Peninsula (IP) Hotel, Restaurant and Institutional (HRI) sector expanded significantly during the mid 80's and 90's and into 2006, as a result of the profound social and economic changes unleashed upon Spain's and Portugal's accession to the European Union (EU) in 1986. The expansion is not yet complete, nor has it slowed much over the years, so we expect that the sector will be of growing interest to some U.S. exporters.

Synopsis of the Iberian Peninsula HRI sector:

- The Iberian Peninsula is one of the top tourism destinations in Europe with the number of tourists increasing every year, boosting demand for meals in the HRI sector.
- In Spain, the HRI sector accounts for about one third of all food consumed.
- Restaurant chains, including ethnic and fast food, are gaining market share and are expected to continue growing.
- Consumption of ready-to-eat/take away food continues to grow as consumers substitute home-cooked for convenience and timesavings. Most hyper and supermarket chains now offer ready-to-eat/take away food, and there is an increasing number of food outlets specializing in take-away food, ranging from barbecue to more traditional meals.

Source: [MAPA](http://www.mapa.es/alimentacion/pags/consumo/2005/panel-05.pdf) – Ministry of Agriculture, Fisheries and Food
<http://www.mapa.es/alimentacion/pags/consumo/2005/panel-05.pdf>

Source: FAS Iberia estimates

The increase in local consumer (tourists excluded) spending on the HRI sector in Iberian Peninsula is due to:

- Smaller households – The number of households without children is increasing. The average family has one or two children per household. Also, single person households are increasing.
- Increasing number of women in the workforce – The percentage of women in the workforce is one of the highest within the EU, bolstering the demand for more ready-to-eat foods, as well as eating-out frequency.
- Change in eating patterns – The increased presence and success of ethnic foods from all over the world has particularly among the younger population.
- Aging population – Around 17 percent of the IP population is now over 60 years old, increasing the demand for senior citizens centers and/or facilities.

In Spain, the HRI sector currently accounts for 26.3 percent of all food consumed. In 2005, the sector increased by 6 percent to € 21,635 million and is expected to continue to increase at a similar pace.

FAS/Iberia (1) 2006 Estimates and (2) 2007 Forecasts using historical data and FAS/Iberia input, unless otherwise identified.

ADVANTAGES AND CHALLENGES FACING U.S. PRODUCTS IN THE IBERIAN PENINSULA

Advantages	Challenges
The IP tourism industry is pushing up demand for more international foods.	Food imported from third countries, including the U.S., must comply with EU food, labeling and traceability regulations, including the labeling of any foods that contain biotechnology ingredients. Requirements, in many cases, differ from those in the United States.
Food products in the market are becoming more diversified.	Competition from neighboring EU countries with the same food and labeling laws, and where tastes and traditional products may be well known.
IP consumers higher incomes and change in consumption habits, including the increased frequency of eating out.	Higher prices for U.S. food products relative to local market and/or imports from neighboring EU countries.
U.S. producers offer quality and a variety of products for the food service industry.	IP importers and consumers still have limited knowledge of the quality and diversity of U.S. food products.

II. ROAD MAP FOR MARKET ENTRY (Charts and Tables Updated Feb. 2007)

A. Entry Strategy

Successful introduction of U.S. products in the Iberian Peninsula market will likely require local representation, personal contact, and/or access through a major EU-based importer. A local representative can provide up-to-date market intelligence, guidance on business practices and trade related laws, sales contact with existing and potential buyers, and market development expertise. The Offices of Agricultural Affairs in Madrid and Lisbon maintain listings of potential importers and are developing sector-specific information to help you introduce your product in the IP market.

U.S. processed food exporters now face even greater challenges in the IP market, because of the new EC labeling and traceability regulations. Any product that contains genetically modified ingredients must be labeled so that the consumer can distinguish the product. Because IP consumers don't yet have familiarity with genetically modified foods the HRI sector, food processors and retailers are reluctant to purchase these processed products or food ingredients for processing.

We are also developing a series of product-specific market access reports that are/will be available to U.S. exporters (please see [SP5037](#), [SP6002](#) and [SP6017](#)). Spain and Portugal generally apply EC rules and regulations, however, there are subtleties that you should learn about if you are thinking of exporting to the IP market. These reports will help you decide how to approach the IP market. For more information, we invite potential U.S. exporters to contact us directly.

In general terms, U.S. exporters already exporting to other EU Members will likely be meeting most of the requirements for exporting into the IP. Typically, food products are imported by an importer, broker and/or wholesaler or distributor. They also supply the HRI sector.

The following documents are required for ocean or air cargo shipments of foodstuffs to Spain and Portugal:

Bill of Lading and/or Airway Bill;

Commercial Invoice;

Phytosanitary Certificate and/or Health Certificate (when applicable)-- If your product is or contains plant or animal products, it will require a phytosanitary certificate issued by the competent U.S. authority. Also, if you are exporting animal products, your plant has to be approved to export into the EU;

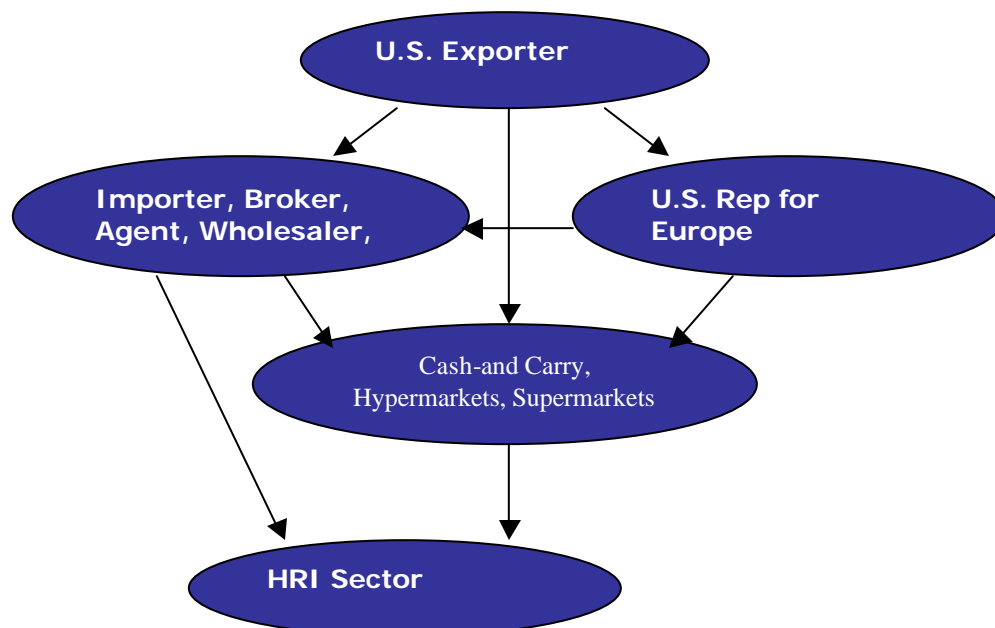

Import Certificate--most food products require an Import Certificate issued by the competent Spanish or Portuguese authority. However, the Import Certificate is obtained by the Spanish or Portuguese importer and/or the agent involved in the business and is intended for tariff classification purposes.

For more information on import and inspection procedures please see SP6018 at <http://www.fas.usda.gov/gainfiles/200607/146208239.doc> and PO6009 at <http://www.fas.usda.gov/gainfiles/200606/146198024.doc>

These reports should be read in conjunction with the equivalent report done by the FAS Office in the U.S. Mission to the European Commission (USEU), E35162 at <http://www.fas.usda.gov/gainfiles/200508/146130611.doc>

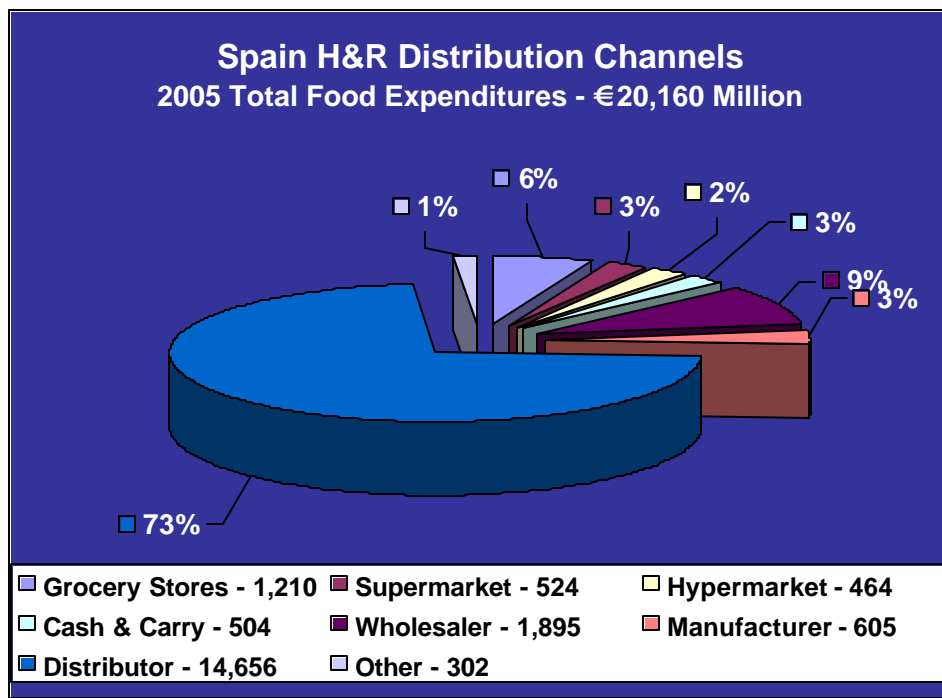

Also, please check the U.S. Mission to the European Union webpage at <http://useu.usmission.gov/agri/fairs.html>, which will guide you on exporting into the EU.

B. Market Structure

The IP HRI sector’s supply channels are diverse and serve small and large customers with different needs. Beverage suppliers are very specialized since most beverage consumption takes place in bars, cafeterias and restaurants. The most important HRI sector suppliers are:

- Importers and Wholesalers--More specialized by product segment, importers and wholesalers also supply directly the HRI sector, particularly the restaurant and hotel chains.
- Commercial distributors--play an important role in the supply of the food and beverages needs of many small and diverse food service providers.
- Wholesale Markets--Most perishable products are purchased at the wholesale market. The HRI sector is, by tradition, a net consumer of fresh produce.
- Cash-and-Carry--Open only to businesses and offering very competitive prices, they supply a wide variety of food products, from perishable to non-perishable, domestic and imported. Some cash-and-carry chains have developed outlets that only service the HRI sector.
- Super and Hypermarkets--Very important to the HRI sector when considering “last minute” purchases. Also important due to their convenient locations.
- Local Producers--Some players in the HRI sector buy directly from local producers, particularly if they are located close to major markets. The IP food service sector has a tradition of using fresh produce in their day-to-day menus. Many restaurants and hotels, particularly along the coasts, buy directly from local producers and fishermen.

C. Sub-Sector Profiles

1. Hotels

The Iberian Peninsula is one of the top tourism destinations in Europe. The tourism infrastructure is well developed throughout both Spain and Portugal and is continuously expanding since tourism is a very important sector for the economies of both countries. During 2006:

- In Spain, total sales in the hotel sector are estimated at almost € 17 billion.
- In Portugal, total sales in the hotel sector are estimated at € 6 billion.
- In Portugal, tourism niche markets have been identified, like golf tourism, with some new, top-quality resorts now under construction.

2. Restaurants

The Iberian Peninsula food service sector expanded significantly in the last couple of decades as noted previously. Although traditional restaurants still dominate, changes in the eating habits and lifestyles of Spaniards and Portuguese have accelerated the increase of chain restaurants, including fast-food and ethnic restaurants. New types of “healthy” fast food restaurants have emerged, as have salad and gourmet bars, vegetarian restaurants, as well as soup bars. Under the speciality food sector, coffee shops and ice-cream shops are also growing very rapidly. Food Courts and other types of food service establishments, located in modern shopping and entertainment centres are very popular and attract a continuously growing number of customers. Fast food chains, restaurants and coffee shops consider such places as key locations for their business. Restaurant chains buy their food products from either local or larger EU-based suppliers in some cases consolidating purchases for the entire chain.

Spain – Leading Fast Food Chains – 2006

Company Name	No. Of Outlets 2005	No. Of Outlets 2006 (Estimated)	Purchasing Agent

3. Institutional

The Iberian Peninsula institutional food service is dominated by the big multinationals, where the top ten companies are responsible for 50 percent of total sales. In addition there are hundreds of local small companies providing catering and events services, but are difficult to account for in term of units and sales. In general terms:

- Every year, an increasing number of institutions, including businesses and industries, schools, health and welfare and many others are contracting their meals to catering companies.
- Spanish total sales of the institutional food sector are estimated at €2.2 billion, on 400 million meals. The sector is expected to continue increasing at around seven percent a year.
- Portuguese total sales of the institutional food sector are estimated at €525 million, on 150 million meals. The sector is expected to continue increasing at around five percent a year.

Large institutional food service companies are price sensitive, importing directly, and/or buying products, particularly fresh produce, from local suppliers.

The Iberian Peninsula Institutional Food Sector by Segment - 2006

	Business & Industry		Education		Health/Welfare		Other Segments		Total
